

Your Personal Lens

An iPhone/iPad Photography and Art Workshop with RMAA Member, Phyllis Shenny

This workshop is about using your iPhone/iPad as a creative tool.

The workshop will focus on using inexpensive apps that allow you to use effects such as paint, color, texture, light, distortion and more to create any piece of art you may have in mind - or haven't even thought of yet. These can be printed on archival printers as original art or used as plans for paintings. We will be creating images both from your photography, from pre-selected shots and from images we may shoot as part of the workshop which will give a good example of the total process.

It will also cover iPhone photography techniques depending on the needs of the students who sign up. iPhone photography has changed the way we look at shooting the world around us and has become an integral part of the current photography world. This class will teach you some secrets you can use to catch shots you may otherwise miss, and to generally use this tool to its full advantage.

Phyllis Shenny, a Parsons graduate and career Art Director, is an award winning digital artist who takes her photos (many shot with her iPhone) and edits them, turning them into pieces of art that have been exhibited in many juried and local shows. She is a member of the National Association of Women Artists, and RMAA, and has won over ten awards in the past two years for her photography and her digitally altered photographs.

She also teaches these classes in the Cancer Support Community of Holy Name Hospital and Valley Hospital Cancer Support.

Date: Sunday, May 20, 2018

Place: The Barn Gallery at Ringwood Manor

Time: 12:00 noon till 3:30 pm
